

Industry Visit Details

1) One day technical visit was organized for 4th Semester Civil Engineering Students to Renuka Sagar Dam which is at Navilutheertha of Saudatti Taluk, Belagavi district and 26 MLD water treatment plants which is at ChikkaNaragunda of Gadag district on 23-1-2024.

At the beginning we visited intake structure which is located at RenukaSagar dam. The height of intake structure is 22 m. There were 3 pumps installed of 260 BHP each. Out of three, one kept as standby. Detailed explanation was given about intake structures, raising mains and pumps to lift the water.

After that we moved to treatment plant. The project name is Multi Village 24x7 Water Supply Scheme for 98 Villages of Ron, Gajendragadha and NaragundTalukas of Gadag District. It is a state government project and was given to TAHAL Group on an agreement of construction and maintenance.

We discussed with Planning Engineers Mr. Panchakshari Hiremath and Mr.Shankaranand, both were cordially helped in understanding each and every units of treatment plant.

Details of aeration unit, chemical feeding device, set of clarri-flocculators, 6 set of rapid sand filters, pumping stations, distribution system by TOSHIBA SCADA technology are explained to students.

In total it was best experience to all of us as well as students in view of understanding an ideal water treatment plant and water supply scheme. Some of the photographs which were took during visit are

Staff Coordinators

Mr. Venkatarreddi Koppad

Mr. Maltesh Suranagi

Ms. Vijayalaxmi Radder

Department of Civil Engineering organized one day field visit for 6th semester students on 12/03/2020 to gain knowledge about water treatment plant, Lift Irrigation Pump House, and CC pavement at jalavadgi, Tq –MundargiDist-Gadag, on 12/03/2020. Mr.S.G.Goudar, Mr.LaxmanPatil, Mr,RajendraShetter and Ms.Premalatha are associated the event successfully.
